PORT, INTERMODAL, AND STEEL SERVICE

# YOKOHAMA

## PHILOSOPHY

At Yokohama we embrace new ideas with old values. While the technologies we build into each and every industrial product consistently deliver the toughness and stability your business requires, it's our approach that sets us apart. Everyone at Yokohama, from our engineers to support staff, is committed to generating value for your business.

### LONGEVITY IS VALUE

When you're under the hook and on a deadline, you need tires that are prepared to keep up and endure the day-to-day scrubbing and scrapping of the yard.

### CONFIDENCE IS VALUE

The last thing an operator wants to feel when lifting a 75,000-pound container 60 feet in the air is the load and mast swaying and rocking. Stability starts on the ground, where there's no room for second guesses.

### CONSISTENCY IS VALUE

When your operation never sleeps there is no time for unexpected or unplanned maintenance. Our tires are designed to withstand rigorous operations and conditions - whether it be absorbing impacts or deflecting blows - for constant performance and consistent service.

### WE VALUE YOUR SUCCESS

The goal of every productive operation is to unfailingly and efficiently deliver over a long period of time. We know this because we hold Yokohama Industrial Tires to the same standard. At Yokohama your success is our success.

# THE VALUE OF TECHNOLOGY

A tire is only as good as the sum of its parts, and at Yokohama we're committed to producing the best performing Industrial products on the market. From innovative casing designs to specialized tread features, there are many parts that come together to build a tire with performance at its core.

## INDUSTRIAL SPEC (ID) COMPOUND\*

Designed to deliver long hours in hostile conditions, our Industrial Spec (ID) Compound is specially formulated to be highly cut resistant and to reduce heat generation to extend the life of your tires and reduce your tire-related costs.

## CROSS-PLY TECHNOLOGIES

Bias industrial tires are engineered with heavy gauge plies that are cross-layered at an intricate degree. We've created reinforced sidewalls that give your stackers, top picks and side loaders extra stability.

## PROTECTIVE BELT PACKAGE

Radial tires are designed to withstand the rigorous operation of intermodal and port operations with a high-strength protective belt package directly under the tread surface which enables our tires to absorb impacts and deflect damaging blows, delivering constant performance and consistent service.

\*Does not apply to all tires shown in this brochure.
